

## Case Study: OPTiM enhance their leading payroll service with the introduction of Engeneum's online payslips solution

OPTiM enhance their leading payroll service with the introduction of Engeneum's online payslips solution; providing improved security for delivery, end-to-end traceability and 7 years retention.

Galway, Ireland

### Challenge

With the introduction of PAYE Modernisation in Ireland in 2019, OPTiM saw significant growth as many companies have identified the need to have accurate and compliant information submitted to the Revenue Commissioners on a timely basis.

**History:** OFS Support Services Ltd, which trades as OPTiM Payroll and OPTiM Financial Solutions, was formed in 2007 and processes in excess of 5,000 payslips per month in a variety of industries such as nursing homes, home care providers, pubs, restaurants, hotels, creches, post offices, garages, software development, medical device manufacturing and various trades in the construction industry.

*....by utilising the Engeneum Online Payslips & HR Portal we are able to provide a more efficient and automated service to our clients continuing our significant growth in recent years....*

Michael O'Hare, Director at OPTiM

### Solution

By implementing the Engeneum e-payslip portal OPTiM are able to support the employees with real-time, 24x7x365 secure, encrypted access to payslips for employees and payroll managers.

There was no need to make changes to the 3 different payroll software packages, the solution simply up-loads and interprets the existing payslip reports.

OPTiM significantly improved efficiency and saved time by removing the need to password protect and e-mail payslips to each user, which is inherently insecure and extremely time consuming.

This solution is independent of the payroll software packages and has been OPTiM branded to appear as an in-house platform which includes a payroll report sign-off and management workflow options.

OPTiM also handles payroll for Irish speaking businesses, and exploits Engeneum's On-line payslips multi-language search and view capability.
